CAPABILITIES STATEMENT

COMPANY OVERVIEW

Bay Tree Defense Services LLC is a Service-Disabled Veteran-Owned Small Business (SDVOSB) built to support federal, defense, intelligence, and prime-contractor customers with disciplined technical services, mission integration, program execution, and operational support.

CORE CAPABILITIES

- Engineering services, technical analysis, planning, systems documentation, and mission systems support.
- Cybersecurity, information assurance, RMF, accreditation, compliance, and secure operations support.
- ISR, technical interoperability, and mission integration support, including training, operational readiness, exercise support, procedures, logistics coordination, and administrative mission support.
- Program/project management, task order support, schedules, deliverables tracking, and stakeholder coordination.

PAST PERFORMANCE & RELEVANT EXPERIENCE

Bay Tree Defense Services leadership brings 50+ years of combined experience supporting DoD, Intelligence Community, Air Force, Air National Guard, Homeland Security, NATO, and defense industry missions across cyber, ISR, intelligence integration, engineering, program management, and coalition interoperability.

- Directed classified cyber, risk management, information assurance, industrial security, and mission support efforts for defense systems and operational environments.
- Provided senior advisory and executive-level support to Air Force organizations including SAF/AQI, AF/A5A, AF/A2I, and SAF-AA.
- Directed architecture development, engineering integration, geospatial intelligence, ISR mission management, targeting support, and intelligence delivery capabilities.
- Led rapid prototyping and fielding for USG customers focused on ISR, high-assurance EW, EMSO, cyber, targeting, and tactical edge ecosystems.

DIFFERENTIATORS

- Veteran-led, mission-first leadership with government, military, and defense industry experience
- Senior cyber, ISR, NATO, coalition, geospatial, and mission integration experience rarely found in a small-business partner.
- Responsive small-business model with practical understanding of government documentation, security, compliance, and execution expectations.
